ASAT Version 4.44
SOFTWARE RELEASE DOCUMENTATION

CHANGE SUMMARY FOR ASAT 4.44, AS OF 28 MAR-2005

- **Regulatory Change**
- **Fixes**
- **Minor/Cosmetic Changes**

~~~~~~

Regulatory Change

Passwords: Due to regulatory security requirements, ASAT now conforms to the 10 Character (or more) logon requirements. New passwords must now include upper and lower case letters, numbers, and special characters. There are **ONLY 4** special characters that can be utilized, and they are as follows:

- Passwords **MUST** start with a letter, either upper case or lower case.

- @ (the "at" symbol)

- # (the "pound" symbol)

- $ (the "dollar" symbol)

- _ (the "underscore")

~~~~~~

Fixes

- Import/Export: The export feature in the CATS module has been a problem with the amount of time it takes to export one or many CATS Actions. That has now been fixed to run quicker. Exports now take 1/10th the time it did previously.

- Lesson Classification for POIs: The security classifications were not displaying properly and are now corrected.

- User Administration: Corrected truncate errors in User Group Administration.

- Lesson Change History Tab: Corrected truncate error in Change History Tab.

- POI Ammo Report (RTF): Corrected the inaccurate quantities being calculated in that report.

~~~~~~

Minor/Cosmetic Changes

- School Code Changes: Several changes to the School Code table in the Support Module, we made as follows:

  - Change - Ammo School to Defense Ammunition Center.

  - Change - TRW to Northrop Corporation Mission Systems

Minor/Cosmetic Changes (continued)

- Change - 1019, NG UNIT/SPEC SCHOOLS-VT to OBSOLETE

- Add – 1030, ARNG (IO) INFORMATION OPERATIONS SCHOOL
